EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Bujon on August 18, 2006.

The application has been amended as follows:

Claim 19: A) “, notably a highly corrosive gaseous fluid” in line 2 and “such as a gas from the combustion of propellants, ” in lines 3-4 have been deleted,

B) –metallic—has been added before “lens” in line 10.

Claim 34: “on” in line 2 has been replaced with –one--.

2. The following is an examiner's statement of reasons for allowance: claims 19-36 are allowed because prior art fail to teach a measuring device for non-stationary radiative and convective heat flux generated in a gaseous fluid (22) under high pressure and at high temperature, the device comprising a tubular metal body (1) open at two extremities, a low heat-loss isotropic chamber (5) mounted coaxially in an interior of the tubular metal body (1), a detector (20) of the radiative heat flux, fixed within the interior of the isotropic chamber (5), the detector being equipped to deliver an electrical signal representative of the non-stationary radiative and convective heat flux generated within the gaseous fluid (22), a metallic lens (11) designed to pump heat of the gaseous fluid

(22) and radiate the heat integrally and instantaneously into the isotropic chamber (5), the lens being mounted on a cap (3) designed to seal one of the two extremities of the tubular metal body (1) and a plug (2) designed to seal a first of the two extremities of the tubular metal body (1), an annular cylindrical space (6) located between the isotropic chamber (5) and the tubular metal body (1) to permit passage of a purging gas (25) circulating in the isotropic chamber (5) and in the annular cylindrical space (6).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.
